

# COAST-TO-COAST SUPPORT

Local Service. National Expertise.

Now as part of Timken Power Systems (TPS), H&N Wind Services has never been better positioned to fulfill the needs of wind farm operators. Whether it is parts, on-site technical services, or shop overhauls and upgrades, we now have a local solution, backed by decades of experience serving the nation's wind power generation infrastructure.

With TPS full-service shops in Denver, CO and Princeton, WV (along with our original Pasco, WA location), we've got you covered from coast to coast. And, in most cases, are within a day's drive of the nation's wind farms.

## THE WARRANTY GOES IN BEFORE THE NAMEPLATE GOES ON

As proud as we are of our ISO 9001:2015 Certification, and the fact that each TPS site achieves this independently, it is the approach we take to overhauling, upgrading and testing the equipment that goes through our shops that we feel sets us apart.

In fact, we are so confident that the processes and standard operating procedures that we employ to get our customers back online – fast – are backed by a full one-year warranty on parts and workmanship. So no matter which of the three H&N Wind Service Centers in the TPS network you choose, our nameplate means you're getting the highest achievable reliability when that equipment goes back in service.

## DELIVERING VALUE TO END-USERS

- Strategically located repair shops
- Rapid response field teams
- Specialized packages for brushes, hybrid bearings, coils, wye rings and winding materials
- Full testing capabilities
- One-stop-shop with overhaul and upgrade capabilities that return generators to "like new" or "better than new" status
